Foreword xi

Preface: About this Book xiii

1 Introduction 1

1.1 What is Computer Vision? 1

1.2 The Many Faces of Computer Vision 2

1.2.1 Related Disciplines, 2

1.2.2 Research and Application Areas, 3

1.3 Exploring the Computer Vision World 4

1.3.1 Conferences, Journals, and Books, 4

1.3.2 Internet, 6

1.3.3 Some Hints on Math Software, 11

1.4 The Road Ahead 11

2 Digital Snapshots 15

2.1 Introduction 16

2.2 Intensity Images 16

2.2.1 Main Concepts, 16

2.2.2 Basic Optics, 18

2.2.3 Basic Radiometry, 22

2.2.4 Geometric Image Formation, 26

2.3 Acquiring Digital Images 28

2.3.1 Basic Facts, 28

2.3.2 Spatial Sampling, 31

2.3.3 Acquisition Noise and How to Estimate It, 32

2.4 Camera Parameters 34

2.4.1 Definitions, 34

2.4.2 Extrinsic Parameters, 35

2.4.3 Intrinsic Parameters, 36
2.4.4 Camera Models Revisited, 38
2.5 Range Data and Range Sensors 40
2.5.1 Representing Range Images, 41
2.5.2 Range Sensors, 41
2.5.3 Active Triangulation, 42
2.5.4 A Simple Sensor, 44
2.6 Summary 47
2.7 Further Readings 47
2.8 Review 48

3 Dealing with Image Noise **51**

3.1 Image Noise 51
3.1.1 Gaussian Noise, 53
3.1.2 Impulsive Noise, 53
3.2 Noise Filtering 55
3.2.1 Smoothing by Averaging, 56
3.2.2 Gaussian Smoothing, 56
3.2.3 Are our Samples Really Gaussian?, 60
3.2.4 Nonlinear Filtering, 62
3.3 Summary 64
3.4 Further Readings 64
3.5 Review 64

4 Image Features **67**

4.1 What Are Image Features? 68
4.2 Edge Detection 69
4.2.1 Basics, 69
4.2.2 The Canny Edge Detector, 71
4.2.3 Other Edge Detectors, 80
4.2.4 Concluding Remarks on Edge Detection, 80
4.3 Point Features: Corners 82
4.4 Surface Extraction from Range Images 85
4.4.1 Defining Shape Classes, 86
4.4.2 Estimating Local Shape, 87
4.5 Summary 90
4.6 Further Readings 90
4.7 Review 91

5 More Image Features **95**

5.1 Introduction: Line and Curve Detection 96
5.2 The Hough Transform 97
5.2.1 The Hough Transform for Lines, 97
5.2.2 The Hough Transform for Curves, 100

5.2.3 Concluding Remarks on Hough Transforms, 100
5.3 Fitting Ellipses to Image Data 101
5.3.1 Euclidean Distance Fit, 101
5.3.2 Algebraic Distance Fit, 103
5.3.3 Robust Fitting, 106
5.3.4 Concluding Remarks on Ellipse Fitting, 107
5.4 Deformable Contours 108
5.4.1 The Energy Functional, 109
5.4.2 The Elements of the Energy Functional, 109
5.4.3 A Greedy Algorithm, 110
5.5 Line Grouping 114
5.6 Summary 117
5.7 Further Readings 117
5.8 Review 118

6 Camera Calibration **123**

6.1 Introduction 123
6.2 Direct Parameter Calibration 125
6.2.1 Basic Equations, 125
6.2.2 Focal Length, Aspect Ratio, and Extrinsic Parameters, 127
6.2.3 Estimating the Image Center, 131
6.3 Camera Parameters from the Projection Matrix 132
6.3.1 Estimation of the Projection Matrix, 132
6.3.2 Computing Camera Parameters, 134
6.4 Concluding Remarks 136
6.5 Summary 136
6.6 Further Readings 136
6.7 Review 137

7 Stereopsis **139**

7.1 Introduction 140
7.1.1 The Two Problems of Stereo, 140
7.1.2 A Simple Stereo System, 143
7.1.3 The Parameters of a Stereo System, 144
7.2 The Correspondence Problem 145
7.2.1 Basics, 145
7.2.2 Correlation-Based Methods, 146
7.2.3 Feature-based Methods, 148
7.2.4 Concluding Remarks, 149
7.3 Epipolar Geometry 150
7.3.1 Notation, 150
7.3.2 Basics, 151
7.3.3 The Essential Matrix, E, 152
7.3.4 The Fundamental Matrix, F, 154

7.3.5 Computing E and F: The Eight-point Algorithm, 155
7.3.6 Locating the Epipoles from E and F, 156
7.3.7 Rectification, 157
7.4 3-D Reconstruction 161
7.4.1 Reconstruction by Triangulation, 162
7.4.2 Reconstruction up to a Scale Factor, 164
7.4.3 Reconstruction up to a Projective Transformation, 166
7.5 Summary 171
7.6 Further Readings 171
7.7 Review 172

8 Motion **177**

8.1 Introduction 178
8.1.1 The Importance of Visual Motion, 178
8.1.2 The Problems of Motion Analysis, 180
8.2 The Motion Field of Rigid Objects 183
8.2.1 Basics, 183
8.2.2 Special Case 1: Pure Translation, 185
8.2.3 Special Case 2: Moving Plane, 187
8.2.4 Motion Parallax, 188
8.2.5 The Instantaneous Epipole, 191
8.3 The Notion of Optical Flow 191
8.3.1 The Image Brightness Constancy Equation, 192
8.3.2 The Aperture Problem, 192
8.3.3 The Validity of the Constancy Equation: Optical Flow, 194
8.4 Estimating the Motion Field 195
8.4.1 Differential Techniques, 195
8.4.2 Feature-based Techniques, 198
8.5 Using the Motion Field 203
8.5.1 3-D Motion and Structure from a Sparse Motion Field, 203
8.5.2 3-D Motion and Structure from a Dense Motion Field, 208
8.6 Motion-based Segmentation 212
8.7 Summary 215
8.8 Further Readings 215
8.9 Review 216

9 Shape from Single-image Cues **219**

9.1 Introduction 220
9.2 Shape from Shading 221
9.2.1 The Reflectance Map, 221
9.2.2 The Fundamental Equation, 223
9.3 Finding Albedo and Illuminant Direction 226
9.3.1 Some Necessary Assumptions, 226
9.3.2 A Simple Method for Lambertian Surfaces, 227

9.4 A Variational Method for Shape from Shading 229
9.4.1 The Functional to be Minimized, 229
9.4.2 The Euler-Lagrange Equations, 230
9.4.3 From the Continuous to the Discrete Case, 231
9.4.4 The Algorithm, 231
9.4.5 Enforcing Integrability, 232
9.4.6 Some Necessary Details, 234
9.5 Shape from Texture 235
9.5.1 What is Texture?, 235
9.5.2 Using Texture to Infer Shape: Fundamentals, 237
9.5.3 Surface Orientation from Statistic Texture, 239
9.5.4 Concluding Remarks, 241
9.6 Summary 241
9.7 Further Readings 242
9.8 Review 242

10 Recognition **247**

10.1 What Does it Mean to Recognize? 248
10.2 Interpretation Trees 249
10.2.1 An Example, 251
10.2.2 Wild Cards and Spurious Features, 253
10.2.3 A Feasible Algorithm, 253
10.3 Invariants 255
10.3.1 Introduction, 255
10.3.2 Definitions, 256
10.3.3 Invariant-Based Recognition Algorithms, 259
10.4 Appearance-Based Identification 262
10.4.1 Images or Features?, 262
10.4.2 Image Eigenspaces, 264
10.5 Concluding Remarks on Object Identification 270
10.6 3-D Object Modelling 270
10.6.1 Feature-based and Appearance-based Models, 271
10.6.2 Object Versus Viewer-centered Representations, 272
10.6.3 Concluding Remarks, 273
10.7 Summary 273
10.8 Further Readings 274
10.9 Review 275

11 Locating Objects in Space **279**

11.1 Introduction 280
11.2 Matching from Intensity Data 283
11.2.1 3-D Location from a Perspective Image, 283
11.2.2 3-D Location from a Weak-perspective Image, 288
11.2.3 Pose from Ellipses, 292

11.2.4 Concluding Remarks, 294
11.3 Matching from Range Data 294
11.3.1 Estimating Translation First, 296
11.3.2 Estimating Rotation First, 300
11.3.3 Concluding Remarks, 301
11.4 Summary 302
11.5 Further Readings 302
11.6 Review 303

A Appendix **307**

A.1 Experiments: Good Practice Hints 307
A.2 Numerical Differentiation 311
A.3 The Sampling Theorem 314
A.4 Projective Geometry 316
A.5 Differential Geometry 320
A.6 Singular Value Decomposition 322
A.7 Robust Estimators and Model Fitting 326
A.8 Kalman Filtering 328
A.9 Three-dimensional Rotations 332

Index **335**
